

PRAKASH DEEP SHARMA

Full-Stack Software Engineer | AI Systems & Distributed Systems Specialist

8051288351 | prakashdeep2902@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years of experience building scalable distributed applications using Node.js, TypeScript, React, And Next.js. Experienced in backend architecture, cloud technologies (AWS, Docker, Kubernetes), AI/LLM integrations, and performance optimization for high-scale systems. Strong foundation in Data Structures, Algorithms, System Design, Networking, and Operating Systems, with a proven track record of delivering reliable, production-grade solutions.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Node.js, GraphQL, REST APIs

Frameworks: React.js, Next.js, Express.js, Nest.js, LLM Pipelines, RAG

CS Fundamentals: Algorithms & Data Structures, Networking, Operating Systems, System Design

Cloud & DevOps: AWS (ECS, S3, Fargate, EC2), Docker, Kubernetes, CI/CD, Git

Databases: PostgreSQL, MongoDB, SQL

PROFESSIONAL EXPERIENCE

Software Engineer, Full-Stack (Remote) — [Document IT LLC](#)

Mar 2025 – Present

- 1) Designed and deployed a production-grade AI monitoring agent for Windows and macOS using Node.js, enabling real-time system tracking and improving operational process speed by 110%.
- 2) Improved API performance by 20% through MongoDB query optimisation, indexing strategies, and refined data access patterns for high-scale distributed systems.
- 3) Replaced MD5 hashing with HMAC-based authentication, significantly strengthening API security and system reliability in production.
- 4) Migrated entire backend codebase from JavaScript to TypeScript, improving maintainability, reducing production bugs, and establishing a testable architecture.
- 5) Integrated Google Gemini AI into a document intelligence pipeline; integrated Stripe for subscription management, contributing to a 10% increase in product revenue.

Software Engineer, Backend — [NoBroker.com](#)

Jun 2023 – Mar 2025

- 1) Designed a TypeScript-based server architecture for dynamic ad serving and user interactions at scale across a distributed platform, increasing engagement by 15%.
- 2) Built a homeownership verification system w, improving accuracy and reducing fraudulent activity by 20%.

KEY PROJECTS

Automatic Job Apply Agent [JavaScript](#) · [LangGraph](#) · [LLM Agents](#) · [Browser Automation](#)

Agentic AI system that autonomously browses job portals, matches listings via LLM reasoning, and auto-fills & submits applications end-to-end. Implemented prompt engineering to parse JDs, tailor cover letters dynamically, and rank opportunities by relevance. Designed a scheduling layer with retry logic and state tracking for reliable multi-step browser automation.

Personal Portfolio with AI Chatbot [Next.js](#) · [Tailwind CSS](#) · [LLM API](#) · [CI/CD](#) · [Cloud Deployment](#)

Responsive portfolio with an AI chatbot using RAG-style retrieval on personal context (resume, projects, skills), deployed on cloud with a full CI/CD pipeline.

ACHIEVEMENTS

Built a tech-focused social media brand with 130K+ followers, publishing educational content on software engineering, system design, and AI.

Promoted to Backend Team Lead on the CK Project, managing cross-team engineering deliverables and ensuring execution Quality.

EDUCATION

B.E. in Computer Science — Lovely Professional University, Jalandhar, India

2017 – 2021
